

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name or designation

McCulloch 4-stroke oil 10W-40

of the mixture

Registration number -

Synonyms None.

Product code 57761 64-15 (1,4L), 577 61 64-21 (0,08L), 531 02 48-15 (1,4L)

Issue date 26-October-2012

Version number 01
Revision date Supersedes date -

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses 4-Stroke oil.

Uses advised against Use in accordance with supplier's recommendations.

1.3. Details of the supplier of the safety data sheet

Supplier

Company nameHusqvarna ABAddressDrottninggatan 2Telephone036-14 65 00

e-mail sds.info@husqvarna.se
Contact person Accessory Department

1.4. Emergency telephone +1-760-476-3961
number (Access code 333721)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

The mixture has been assessed and/or tested for its physical, health and environmental hazards and the following classification applies.

Classification according to Directive 67/548/EEC or 1999/45/EC as amended

This preparation is not classified as dangerous according to Directive 1999/45/EC and its amendments.

Hazard summary

Physical hazards Not classified for physical hazards.

Health hazards Not classified for health hazards.

Environmental hazards Not classified for hazards to the environment.

Specific hazards May cause eye irritation on direct contact. May form vapours or oil mists during mechanical action

or at elevated temperatures which may be irritating to respiratory tract. Prolonged exposure to oil mist may cause pulmonary disease such as chronic inflammation. Prolonged and repeated contact with used oil may cause serious skin diseases, such as dermatitis and skin cancer.

Main symptoms Irritation of eyes and mucous membranes. Defatting of the skin. Dermatitis. Ingestion may cause

irritation and malaise. In high concentrations, mists/vapors may irritate throat and respiratory

system and cause coughing.

2.2. Label elements

Label according to Directive 67/548/EEC or 1999/45/EC as amended

R-phrases None.
S-phrases None.
Authorization number None.

Supplemental label information Not applicable.

2.3. Other hazards Not a PBT or vPvB substance or mixture.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

McCulloch 4-stroke oil 10W-40 SDS EU

906401 Version No.: 01 Revision date: - Issue date: 26-October-2012

#: This substance has been assigned Community workplace exposure limit(s).

Composition comments

The full text for all R- and H-phrases is displayed in section 16. All concentrations are in percent

by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

SECTION 4: First aid measures

General information If you feel unwell, seek medical advice (show the label where possible).

4.1. Description of first aid measures

Inhalation Move to fresh air. If breathing is difficult, give oxygen. Call a physician if symptoms develop or

persist.

Skin contact Wash with soap and water. In case of rashes, wounds or other skin disorders: Seek medical

attention and bring along these instructions. If high pressure injection under the skin occurs,

always seek medical attention.

Eye contact Immediately flush with plenty of water for up to 15 minutes. Remove any contact lenses and open

eyelids wide apart. If irritation persists: Continue flushing during transport to hospital. Take along

these instructions.

Ingestion Never give anything by mouth to an unconscious person. Do NOT induce vomiting. If vomiting

occurs, keep head low so that stomach content doesn't get into the lungs. Get immediate medical

attention.

4.2. Most important symptoms

and effects, both acute and

delayed

4.3. Indication of any

Irritation of eyes and mucous membranes. Defatting of the skin. Dermatitis. Ingestion may cause irritation and malaise. In high concentrations, mists/vapors may irritate throat and respiratory

system and cause coughing.

immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia. Symptoms may be delayed. HIGH PRESSURE SKIN INJECTION: Physician must be familiar with local procedures for treatment of this type of wound; incision, irrigation, removal of all necrotic tissue

and open wound dressing.

SECTION 5: Firefighting measures

General fire hazards Heating may generate vapors which may form explosive vapor/air mixtures. Material will float and

can be re-ignited on surface of water.

5.1. Extinguishing media

Suitable extinguishing

media

Foam. Dry powder. Carbon dioxide (CO2). Water fog.

Unsuitable extinguishing

media

Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

By heating and fire, irritating vapours/gases may be formed.

5.3. Advice for firefighters

Special protective equipment for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in

the workplace.

Special fire fighting procedures

Move container from fire area if it can be done without risk. Use water spray to cool unopened containers. Cool containers exposed to flames with water until well after the fire is out.

SDS EU McCulloch 4-stroke oil 10W-40

906401 Version No : 01 Revision date: - Issue date: 26-October-2012

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Wear protective clothing as described in section 8 of this safety data sheet. In case of spills, beware of slippery floors and surfaces.

For emergency responders

Keep unnecessary personnel away. Wear protective clothing as described in Section 8 of this

safety data sheet.

6.2. Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not allow to enter drains, sewers or watercourses. Environmental manager must be informed of all major releases.

6.3. Methods and material for containment and cleaning up

Remove sources of ignition. Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible.

Large Spills: Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Wash area with soap and water.

Small Spills: Wipe up spilled material and place in a suitable container for disposal. Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use.

6.4. Reference to other sections

For personal protection, see section 8. For waste disposal, see section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Wear protective clothing as described in Section 8 of this safety data sheet. Use only in well-ventilated areas. Avoid inhalation of oil mist and contact with skin and eyes. Do not eat, drink or smoke when using the product. Be aware of potential for surfaces to become slippery. Observe good industrial hygiene practices.

7.2. Conditions for safe storage, including any incompatibilities

Keep away from ignition, flame and heat sources. Store in a cool, dry, well-ventilated place. Store away from incompatible materials.

7.3. Specific end use(s) 4-Stroke oil.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Wear protective gloves. Nitrile gloves are recommended, but be aware that the liquid may - Hand protection

penetrate the gloves. Frequent change is advisable. Suitable gloves can be recommended by the

glove supplier.

- Other Wear appropriate clothing to prevent repeated or prolonged skin contact.

Respiratory protection In case of inadequate ventilation or risk of inhalation of oil mist, suitable respiratory equipment

with combination filter (type A2/P2) can be used. Wear air-supplied mask in confined areas. Seek

advice from local supervisor.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

McCulloch 4-stroke oil 10W-40 SDS EU Hygiene measures Always observe good personal hygiene measures, such as washing after handling the material

and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. When using, do not eat, drink or smoke. Launder contaminated clothing before reuse. Private clothes and working clothes should be kept

separately.

Environmental exposure

controls

Environmental manager must be informed of all major spillages.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance Brown liquid. **Physical state** Liquid. **Form** Liquid.

Colour Brown. Oily. Slight. Odour **Odour threshold** Not available. Not applicable. pН Melting point/freezing point Not available. Initial boiling point and boiling Not available.

range

> 200 °C (> 392 °F) Cleveland open cup (ASTM D 92) Flash point

Flammability limit - lower

Flammability limit - upper

Not available.

Not available.

(%)

Not available. Vapour pressure Not available. Vapour density

0,876 (15 °C) (ASTM D 4052) (Water = 1) Relative density

Solubility(ies) Negligible.

Partition coefficient Log Kow: >3 (Estimated).

(n-octanol/water)

Not available. **Auto-ignition temperature Decomposition temperature** Not available.

Viscosity 90 mm2/s (40 °C) (ASTM D 455)

Explosive properties Not available. Oxidizing properties Not oxidizina.

9.2. Other information No relevant additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity The product is non-reactive under normal conditions of use, storage and transport.

10.2. Chemical stability Material is stable under normal conditions. 10.3. Possibility of hazardous Hazardous polymerisation does not occur.

10.4. Conditions to avoid

reactions

Heat, sparks, flames, elevated temperatures. Contact with incompatible materials.

10.5. Incompatible materials Strong oxidising agents.

10.6. Hazardous

decomposition products

By heating and fire, irritating vapours/gases may be formed. Carbon oxides.

SECTION 11: Toxicological information

General information Occupational exposure to the substance or mixture may cause adverse effects.

Information on likely routes of exposure

Ingestion Ingestion may cause irritation and malaise. Ingestion may result in vomiting; aspiration (breathing)

of vomitus into lungs must be avoided as even small quantities may result in aspiration

pneumonitis.

Inhalation Inhalation of oil mist or vapours formed during heating of the product will irritate the respiratory

system and provoke coughing.

SDS EU McCulloch 4-stroke oil 10W-40

Skin contact Prolonged or repeated contact may dry skin and cause dermatitis.

Eye contact Contact with eyes may cause irritation.

Symptoms Irritation of eyes and mucous membranes. Defatting of the skin. Dermatitis. Ingestion may cause

irritation and malaise. In high concentrations, mists/vapors may irritate throat and respiratory

system and cause coughing.

11.1. Information on toxicological effects

Acute toxicity May irritate and cause stomach pain, vomiting, diarrhoea and nausea. Human evidence indicates

that the product has very low acute oral, dermal or inhalation toxicity. However, it can produce severe injury if taken into the lung as a liquid, and there may be profound central nervous system

depression following prolonged exposure to high levels of vapour.

Skin corrosion/irritation

Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis.

Serious eye damage/irritation

Contact with eyes may cause irritation.

Respiratory sensitisation Skin sensitisation

No data available.

No data available.

Germ cell mutagenicity

No data available to indicate product or any components present at greater than 0.1% are

mutagenic or genotoxic.

Carcinogenicity
Reproductive toxicity

Not classified.

Specific target organ toxicity - single exposure

No data available.

High concentrations: May cause respiratory irritation.

Specific target organ toxicity -

repeated exposure

No data available.

Aspiration hazard

Not classified, however droplets of the product may be aspirated into the lungs through ingestion

or vomiting and may cause a serious chemical pneumonia.

Mixture versus substance

information

Not available.

Other information

Prolonged and repeated contact with used oil may cause serious skin diseases, such as

dermatitis and skin cancer.

SECTION 12: Ecological information

12.1. Toxicity The product is not classified as environmentally hazardous. However, this does not exclude the

possibility that large or frequent spills can have a harmful or damaging effect on the environment.

12.2. Persistence and

degradability

Expected to biodegrade slowly.

12.3. Bioaccumulative potential

The product contains potentially bioaccumulating substances.

Partition coefficient

n-octanol/water (log Kow)

Log Kow: >3 (Estimated).

Bioconcentration factor (BCF)

Not available.

12.4. Mobility in soil No

Mobility in general The product is insoluble in water. It will spread on the water surface while some of the

components will eventually sediment in water systems. The volatile components of the product will

spread in the atmosphere.

12.5. Results of PBT

and vPvB assessment

Not a PBT or vPvB substance or mixture.

12.6. Other adverse effectsOil spills are generally hazardous to the environment.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Residual waste Dispose of in accordance with local regulations. Empty containers or liners may retain some

product residues. This material and its container must be disposed of in a safe manner (see:

Disposal instructions).

Contaminated packaging

EU waste code

Empty containers should be taken to an approved waste handling site for recycling or disposal.

The Waste code should be assigned in discussion between the user, the producer and the waste

disposal company.

Disposal methods/information Dispose in accordance with all applicable regulations. This material and/or its container must be

disposed of as hazardous waste.

McCulloch 4-stroke oil 10W-40 SDS EU

906401 Version No.: 01 Revision date: - Issue date: 26-October-2012

SECTION 14: Transport information

ADR

The product is not covered by international regulation on the transport of dangerous goods.

RID

The product is not covered by international regulation on the transport of dangerous goods.

ADN

The product is not covered by international regulation on the transport of dangerous goods.

IATA

The product is not covered by international regulation on the transport of dangerous goods.

IMDG

The product is not covered by international regulation on the transport of dangerous goods.

14.7. Transport in bulk

Not applicable.

according to Annex II of

MARPOL 73/78 and the IBC

Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex I

Not listed.

Regulation (EC) No. 1005/2009 on substances that deplete the ozone layer, Annex II

Not listed.

Regulation (EC) No. 850/2004 On persistent organic pollutants, Annex I as amended

Not listed.

Regulation (EC) No. 689/2008 concerning the export and import of dangerous chemicals, Annex I, part 1 as amended Not listed.

Regulation (EC) No. 689/2008 concerning the export and import of dangerous chemicals, Annex I, part 2 as amended Not listed.

Regulation (EC) No. 689/2008 concerning the export and import of dangerous chemicals, Annex I, part 3 as amended Not listed.

Regulation (EC) No. 689/2008 concerning the export and import of dangerous chemicals, Annex V as amended Not listed.

Regulation (EC) No. 166/2006 Annex II Pollutant Release and Transfer Registry

Not listed

Regulation (EC) No. 1907/2006, REACH Article 59(1) Candidate List as currently published by ECHA Not listed.

Authorisations

Regulation (EC) No. 143/2011 Annex XIV Substances Subject to Authorisation

Not listed

Restrictions on use

Regulation (EC) No. 1907/2006, REACH Annex XVII Substances subject to restriction on marketing and use as amended Not listed.

Directive 2004/37/EC: on the protection of workers from the risks related to exposure to carcinogens and mutagens at work

Not regulated.

Directive 92/85/EEC: on the safety and health of pregnant workers and workers who have recently given birth or are breastfeeding

Not regulated.

Other EU regulations

Directive 96/82/EC (Seveso II) on the control of major-accident hazards involving dangerous substances

Not regulated.

Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical agents at work

Directive 94/33/EC on the protection of young people at work

Not listed.

Other regulations The product is classified and labelled in accordance with EC directives or respective national

laws. This Safety Data Sheet complies with the requirements of Regulation (EC) No 1907/2006.

National regulations Follow national regulation for work with chemical agents.

McCulloch 4-stroke oil 10W-40 SDS EU

15.2. Chemical safety

assessment

No Chemical Safety Assessment has been carried out.

SECTION 16: Other information

List of abbreviationsDNEL: Derived No-Effect Level.

PNEC: Predicted No-Effect Concentration.
PBT: Persistent, bioaccumulative and toxic.
vPvB: Very Persistent and very Bioaccumulative.
